HEALTH CAMPUS LIMBURG DC

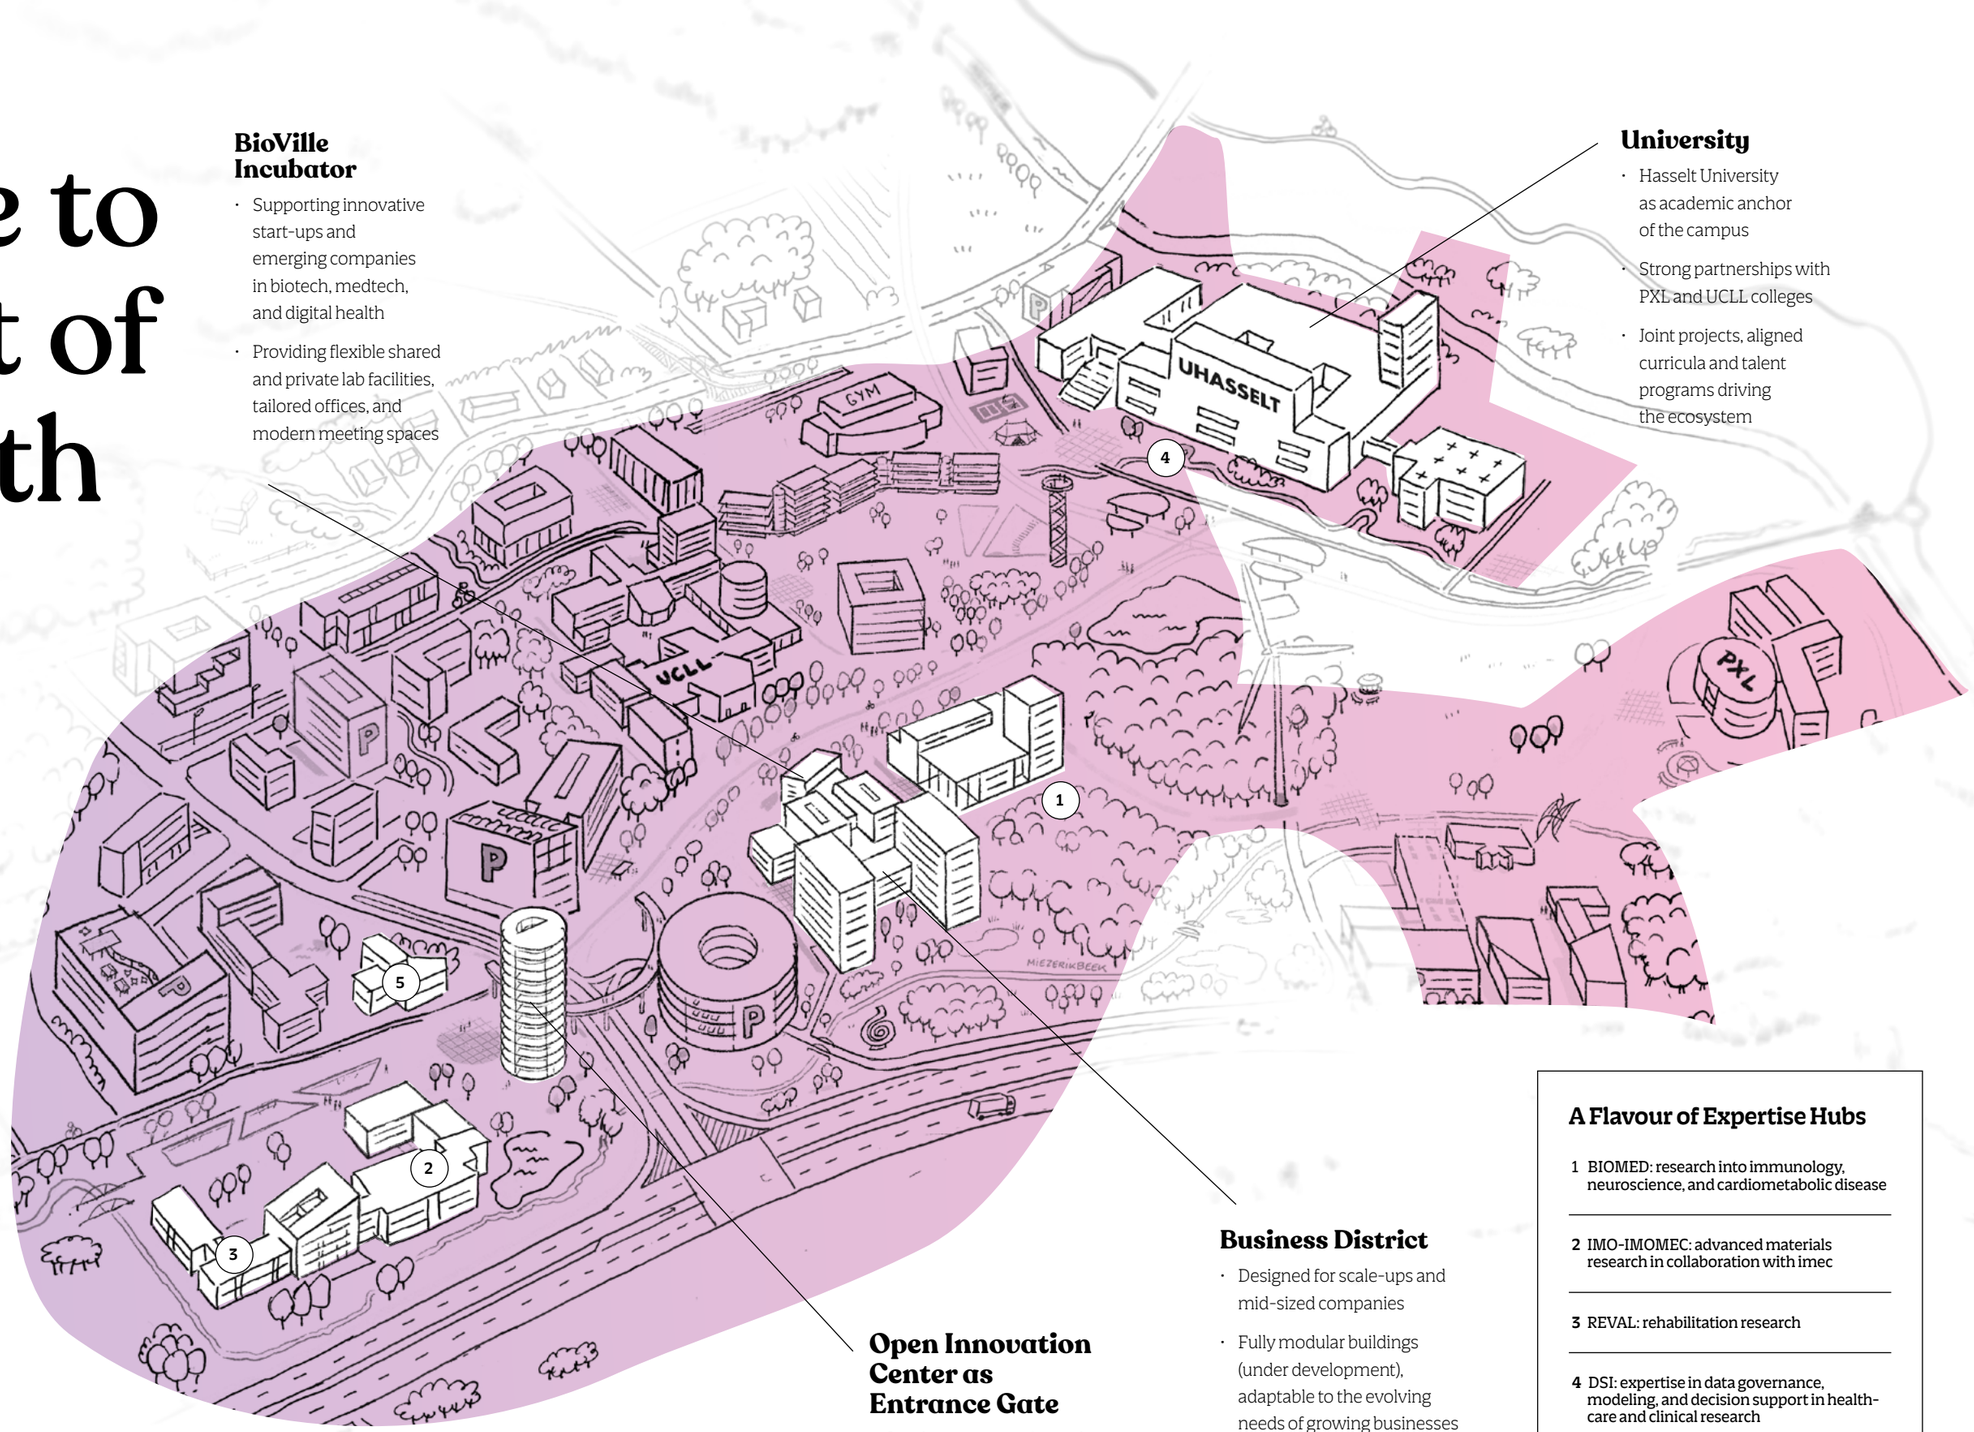
Led by innovation.
Driven by *heart*.

pom Powering Limburg's economy

HEALTH CAMPUS AT THE HEART OF LIMBURG DC

Welcome to the heart of our Health Campus

What if you brought together institutions for education, government, health and business on one innovative campus? Ideas for the future of our healthcare system start to bubble up like no soda ever did. The magic is real. Add a strong community atmosphere and you have the perfect place to do business, innovate and study.



BioVille Incubator

- Supporting innovative start-ups and emerging companies in biotech, medtech, and digital health
- Providing flexible shared and private lab facilities, tailored offices, and modern meeting spaces

University

- Hasselt University as academic anchor of the campus
- Strong partnerships with PXL and UCLL colleges
- Joint projects, aligned curricula and talent programs driving the ecosystem

Open Innovation Center as Entrance Gate

- Iconic gateway and meeting point of the campus
- State-of-the-art auditorium, meeting and boardrooms
- Home of the open innovation hub for healthcare, research and business
- Designed by a renowned collective of the Paris-based Studio Muoto and Ghent-based Tab architects

Business District

- Designed for scale-ups and mid-sized companies
- Fully modular buildings (under development), adaptable to the evolving needs of growing businesses

A Flavour of Expertise Hubs

1 BIOMED: research into immunology, neuroscience, and cardiometabolic disease

2 IMO-IMOMEC: advanced materials research in collaboration with imec

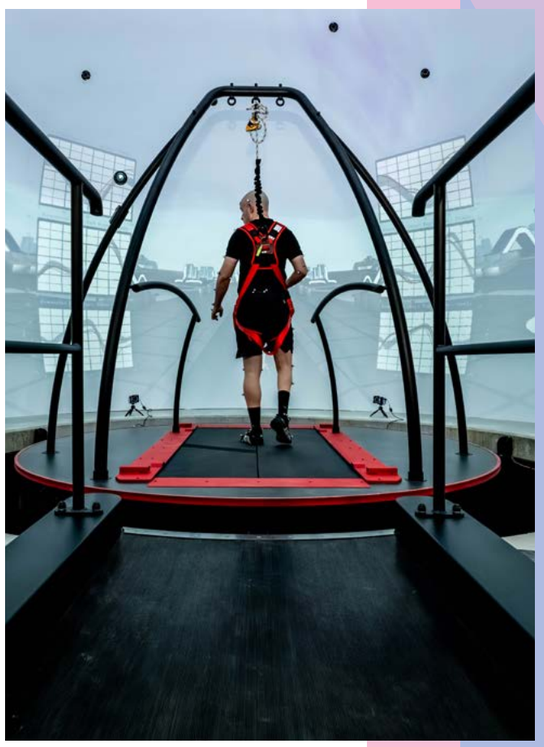
3 REVAL: rehabilitation research

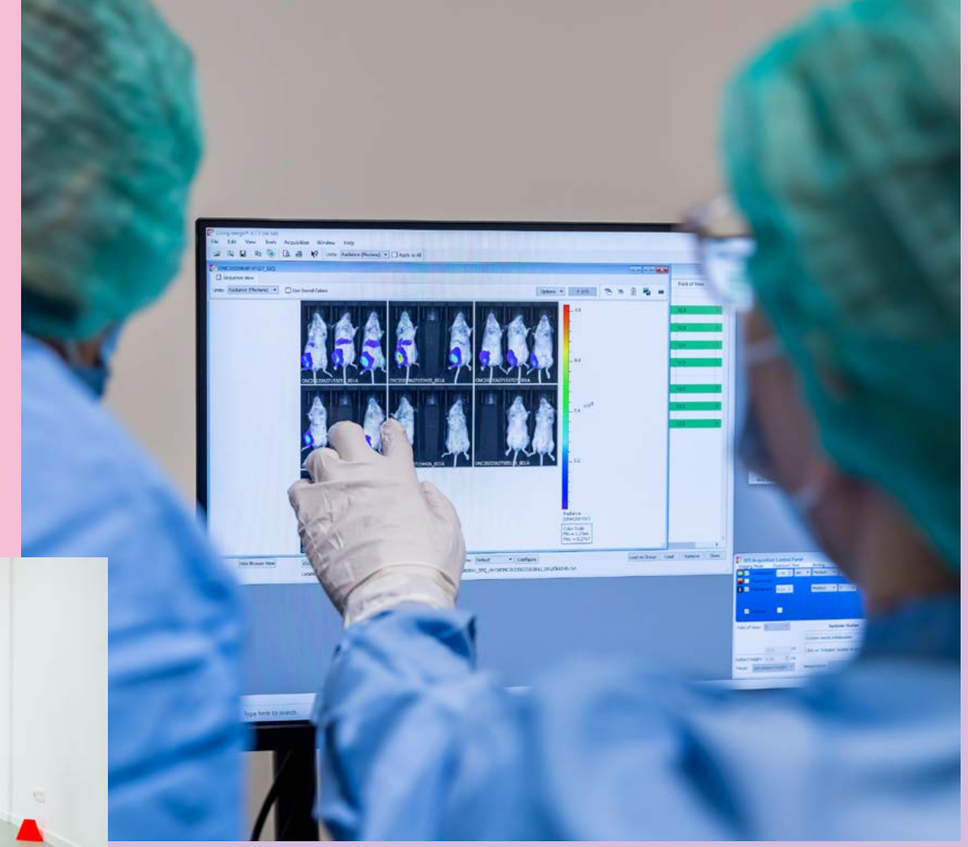
4 DSI: expertise in data governance, modeling, and decision support in healthcare and clinical research

5 Digital Future Lab: human-computer interaction, augmented and virtual reality, cybersecurity

Big ideas deserve big opportunities. That is why we look forward to welcoming you.

Where bright minds meet big dreams





"Building today what healthcare needs tomorrow."

40 companies and approximately 1,500 employees. That's where we are now. Ready to grow. By housing start-ups, scale-ups, and established companies on the same campus, a unique dynamic is created. Natural mentorship relationships and collaborative projects are springing up like mushrooms. Talk about fertile ground. Together, we're working towards one common goal: becoming the European reference for healthcare innovation applications.

HOSPITALS

From care to discovery

- Unique collaboration with hospitals for **clinical research and validation**
- Clinical trial units connecting to key opinion leaders; **FutureHealth by ZOL**, **Frame by Jessa**
- Connecting basic to clinical research in autoimmunology in the **university MS centre** with Noorderhart Hospital

KEY TECHNOLOGY PLATFORMS

From lab to life

- **Mobile Health Unit & Remote Clinical Monitoring Center** - real-world testing for digital health solutions
- **THINK³** - the engine room for systems and process innovation in healthcare
- **MOVElab** - unique European hotspot for advanced motion analysis
- **Advanced optical microscopy center** - part of Flanders Bioimaging and ZEISS lab@location
- **3D Printing & Biobanking** - enabling the next generation of personalised medical solutions

TALENT AT YOUR DOORSTEP

From classroom to breakthrough

- **Hasselt University and Universities of Applied Sciences PXL and UCLL** joining forces
- **Joint projects**, aligned curricula and talent programmes in life sciences at all levels of training: bachelor, master and doctoral programs
- **Constant flow** of students, researchers and entrepreneurs
- **Eight top-tier** universities within an hour's drive

BIOVILLE INCUBATOR

From idea to impact

- Hotspot where organisations and start-ups in healthcare **grow and thrive**
- **Shared facilities** with diverse workspaces, experimental areas and laboratories for a wide range of applications
- All **key actors** from the health and care sector united in one tight-knit community

Your gateway to the European market

With partners in Singapore, South Korea, Japan, the US and various European regions, you will be warmly surrounded by an ambitious network. Meet up at thematic seminars, lunch & learn sessions or at that cosy barbecue where the best conversations are those about the questionable hobby groups you were in as a teenager.

Tom Vandeput
DEPUTY
PROVINCE OF LIMBURG

Noël Slangen
GENERAL MANAGER
PROVINCIAL DEVELOPMENT AGENCY

Health Campus Limburg DC is more than just a collection of buildings, it is the vibrant heart of a growing ecosystem. Here, education, healthcare, business and government come together in an open environment where collaboration happens almost naturally. The result is a community that connects talent, ideas and ambition, and turns them into real opportunities.

Our mission goes beyond offering infrastructure. We create an environment where companies feel supported, researchers find strong partners and new ideas are given the chance to grow. With tailor-made guidance, direct access to expertise and a culture of collaboration, Health Campus offers the fertile ground where innovation can flourish.

The ambition reaches beyond Belgium. With strong partnerships in Europe, Asia and the US, Health Campus is positioned as a true gateway to the international healthcare innovation market. By fostering exchange across borders and disciplines, we establish the campus as the European reference point for health-care innovation in practice.

The Entrance Gate Building is the beating heart of the campus, where an open atmosphere almost inevitably leads to connection.

Meet our ambassadors of the heart

As a home to more than 40 health start-ups and international ventures, Health Campus is the place where innovation takes shape. Companies find not only office and laboratory space, but also the support, network and infrastructure they need to accelerate growth.

Here, entrepreneurs connect with researchers, clinicians and fellow innovators. Together, they explore new technologies, develop groundbreaking therapies and bring health solutions to market.
By combining scientific excellence with entrepreneurial drive, Health Campus provides the fertile ground where ideas turn into impact.

Plug into our network

"Being part of the Health Campus ecosystem is truly inspiring. The powerful networking opportunities have helped us further build our company and deliver a meaningful impact on aging-related diseases."

Dr. Ann Beliën,
Founder & CEO at Revujenate Biomed

"The ecosystem of Health Campus and the support of the BioVille incubator have certainly stimulated our growth towards an internationally networked medtech-specialised CRO. Our team really enjoys the dynamic campus vibe."

Dr. Karen Gabriëls,
Clinical Research Manager at Archer Research

Fuel your research

Raise the bar for clinical research

"As a prime clinical research center, we strongly believe that the environment of Health Campus Limburg DC is inspiring to our research staff and is an asset in delivering high-quality research that leads to faster innovation and better outcomes for patients."

Dr. Erik Buntinx,
CEO & Principal Investigator
at Anima Research Center

"The long-standing collaboration with Hasselt University has been very enriching in developing our offering in preclinical research services. This collaboration is an example of the strong potential in the Health Campus ecosystem."

Dr. Kris Motmans,
CEO at Innoser Laboratories

Hit the ground running

Limburg flowing through your lungs

01

Take the stunning landscapes of America's national parks, the craftsmanship of Peru's famous pisco distilleries, and the edgy fashion sense of Tokyo. Now scale down in size. And mix them with a great love of music, delicious food, and the charming remnants of an equally vibrant past. That's where Limburg gets its oxygen.

02

Did you know that people in Limburg live longer on average than residents of neighboring border regions? In fact, scientists at Health Campus are working hard to uncover their secret. Is it the authentic Italian cuisine that miners brought with them when they settled in Limburg in the last century? Is it the genuine friendliness that seems to come with the tap water? Or the irresistible Limburg pie? You'll find out soon enough.

Let the green surroundings and the opportunities that Limburg offers inspire you during and after working hours. Whether you like to push boundaries, connect through sports, or simply enjoy the peace and quiet.

Talent without borders

- **50%** of Europe's purchasing power within **450 km**
- **Germany** and **the Netherlands** a stone's throw away
- Reach **100M+ consumers** and **200K+ businesses**, all from one location
- Linked to **15+ higher education institutions**
- **30.000+ students and 10.000+ researchers** across a tri-country networking 450 km

We're good in what makes people better

At Health Campus, innovation starts with people. By uniting researchers, clinicians, entrepreneurs and students, we create the ground where ideas grow into solutions that improve lives.

Here, knowledge, talent and technology reinforce each other. This is how we shape the future of healthcare: turning bold ideas into real impact for patients.

Shaping the future

- We're building a **thriving ecosystem** with global visibility and international appeal.
- By bringing together critical mass, we enable powerful **cross-pollination** — where ideas, talent, and technology fuel each other.
- Our campus is becoming **Europe's go-to reference** for turning groundbreaking healthcare innovations into real-world solutions.
- **Think. Act.** Turn groundbreaking healthcare innovations into real-world solutions and use our network to overcome hurdles on your way.
- The **"Made by Health Campus" label** stands for excellence and trust, showcasing innovations that are ready to scale.
- Our ambition is bold: by 2050, at least 10 Health Campus innovations will be **transforming lives worldwide**.

You have personalized medicine? **We have personalized support!**

Health Campus offers a warm welcome and tailor-made guidance for companies looking to establish themselves. Our approach is community-driven, built on short communication lines and long-lasting relationships. At Health Campus, you're not just joining a location — you're joining a network. We truly mean it when we say: "We grow together with you."

"We don't just host companies – we connect them to people, partners and opportunities that make a difference."

Meet your guides. Your friendly point of contact. They'll listen first, then tailor support that only your dedicated, organised older sister can rival.

Welcome Management

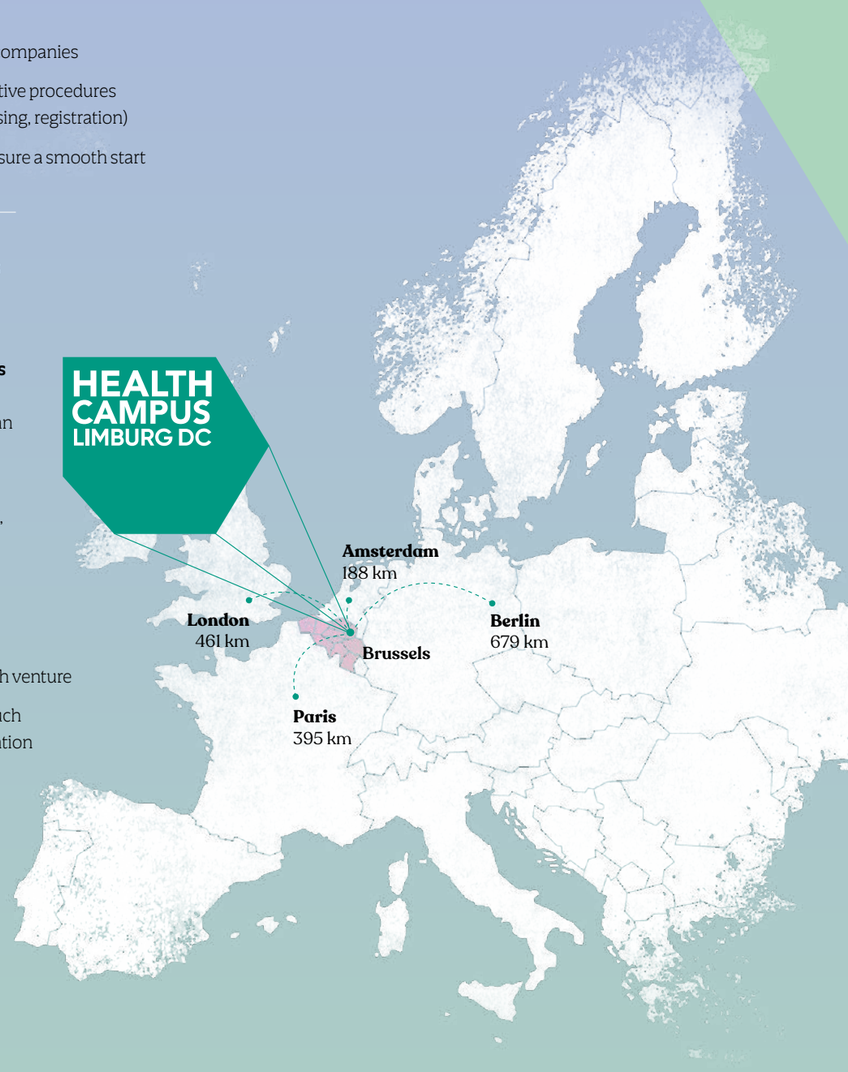
- Seamless onboarding of international companies
- Guidance through legal and administrative procedures (including banking, expat services, housing, registration)
- Tailored, **free-of-charge** support to ensure a smooth start

Ecosystem Connections

- **Guidance** on tax incentives, legal structures and intellectual property
- Access to **public funding programmes** through Flanders Innovation & Entrepreneurship (VLAIO) and European funding schemes (ERDF, Horizon, ...)
- **Direct links** to investors, R&D partners and clinical trial experts, including LRM, a leading regional venture capitalist
- **Euregional connections** to nearby German and Dutch innovation hubs
- Partner of the renowned **imec.istart** accelerator program, boosting your tech venture
- **Strong partnerships** with networks such as Biovia, and the International Association of Science Parks and Innovation Areas

biovia

imec istart



INTERNATIONAL POSITIONING

Your gateway to Europe's innovation ecosystem.

- Collaboration with **Flanders Investment & Trade (FIT)** to attract global innovators and help you grow internationally
- Active **participation in leading trade fairs** and direct connections to international life sciences hubs. We are proud of our ecosystem members and happy to share their story
- Direct access to the **Flemish and European healthcare and innovation ecosystem**
- Soft landing programs **supporting international companies** with legal, HR, and cultural integration
